SCREEN PROTECTOR

Vivid Glass

- New mobile accessories, showing design on the **Entire smartphone screen** with screen protectors.
- Direct digital printing on GLASS, which makes it have a **better definition and transparency** than competitors', who initially print it on the film and then adhere it on the glass.
- Individuals and groups (school, business, community etc.) can get their own customized design.
- Counteract to the new trend of showing personality on personal products.
- **Relieve the boredom** of unified design on customer's phone.

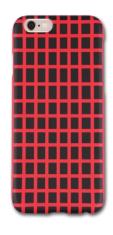

Vivid Case

- We can offer customers not only **'Protection'** but also give them a **full color designed** printed case.
- Our product is able the help customers meet their desires in customizing daily products with unique style.
- Able to print individuals' photograph on the case and help them have their precious memories close to them.

3D Sublimation Technology

Our technology and equipment can support **high quality** of printing output. Even the **edge side** area of the case can be supported with **HD resolution quality.**

- One touch Automation system
- Speed for one printing: 360 sec
- Size: 37 x 50 x 40 cm
- Weight: less than 35kg
